LEGAL DISCLAIMER

The information in this White Paper is subject to change or update and should not be interpreted as a pledge, promise, or guarantee by GLOBAL SMART PAY TOKEN , or any other person or organization stated in this white paper, about the potential availability of services related to the use of the tokens, or their future performance or value. This document does not contain an offer to sell shares or securities. It does not comprise or form part of, and cannot be perceived as, an offer for sale or subscription of, or a proposal to buy any securities, nor should it or any part of it form the basis of, or be relied on in connection with, any contract or commitment of any kind. The GLOBAL SMART PAY TOKEN Token expressly disclaim any responsibility for any direct or substantive loss or damage of any kind occurring directly or indirectly from reliance on any information provided in the whitepaper, any error, omission, or inaccuracy in such information, or other action taken as a result of such information. This is strictly informational and does not contain a buying proposal or financial advice. Do not trade or invest in tokens, companies, or entities merely based on this documentation. Any investment entails significant risks, including, but not limited to, price volatility, insufficient liquidity, and the potential total loss of principal. Before deciding to invest, investors should perform detailed thorough research mostly on matters presented throughout this document, with the support of professional financial, legal, and tax experts, and establish a stand-alone opinion of the marketplace.

We gathered all of the data presented in this document from sources we consider to be credible and correct. Moreover, such information is available "as is," without any express or presumed contract or any. All prices, data, and other information are not guaranteed to be complete or accurate, are based on selected public market data, indicate current market conditions, and our perspective as of this date, and are thus subject to change without notice. The graphs, charts, and other visuals are mainly served for informational purposes. None of these graphs, charts, or visual aids can be used to make investment decisions in itself. No representation is made that these will help anyone make investment decisions, and no graph, chart, or other visual aid can capture all of the factors and variables that must be considered. This document may contain or incorporate by reference, forward-looking statements, which are any statements that are not declarations of historical fact. There have been no representations or warranties made as to the accuracy of such forward-looking remarks. Any predictions, estimates, and forecasts throughout this document are usually speculative and are based on certain assumptions. These forward-looking declarations may indicate to be incorrect and may be influenced by incorrect assumptions or known or unknown risks, uncertainties, and other factors, the majority of which are far beyond the control of the organization.

Any predictions, estimates, and forecasts throughout this document are usually speculative and are based on certain assumptions. These forward-looking declarations may indicate to be incorrect and may be influenced by incorrect assumptions or known or unknown risks, uncertainties, and other factors, the majority of which are far beyond the control of the organization. It is reasonable to expect that some or all of these forward-looking assumptions will not be realized or will differ markedly from the overall performance.

ABSTRACT

Right now, there is indeed phenomenal growth throughout the Blockchain Industry. As of 2021, massive cryptocurrency milestones such as Bitcoin and Ethereum have reached all-time highs, indicating a future powered by Blockchain and cryptocurrencies.

Despite significant short-term growth and market volatility, this ecosystem demonstrates a bright future, huge profits, and data protection. "GLOBAL SMART PAY TOKEN " has devised excellent products and services for the benefit of all Investors by demonstrating the possibilities for growth in this market. GSPT is a one-of-a-kind BSC-based ecosystem with a wide range of Gaming , NFT \$ high-yielding applications. This is based on the biggest Blockchain revolution, The Metaverse Applications, NFTs or Non-Fungible Tokens, which are worth millions of dollars. We are decentralizing & simplifying the use of blockchain integration for FUN, ENTERTAINMENT BUT WITH A PURPOSE. NFT ecosystem to be developed by delivering an exceptional yet scalable solution that increases our original GSPT Token value for all users and operators. GLOBAL SMART PAY TOKEN primary use cases are CEX Use case extensions, NFT marketplace, Hybrid Blockchains All under the brand name of "GSPT".

OUR GOAL

Many aspects of society are not fully understood in the context of their capabilities and technological advancements; we want to transform it by supporting and demonstrating that there can be great people in the crypto world who integrate the best of the Blockchain Industry for the community. Using Blockchain applications & extending utility functions to solve real life problems is the sole purpose behind every development happening or supposed to happen in future at GSPT Ecosystem, The first ever gateway to the future.

GSPT – GLOBAL SMART PAY TOKEN

GSPT is a registered business entity FROM LONDON, UK.

The leadership team consists of industry experts from the Forex sector, experienced programmers and developers, designers, marketing specialists, and accounting experts. With www.gspt.io the leadership team aims to resolve problems faced by consumers through the provision of a decentralized e-Commerce based marketplace and Forex Industry Payment Gateway Through CRM Powered by Blockchain technology.

The management at Global Smart Pay has launched www.gspt.io believes that the underlying factor that will continue to define Blockchain products are the ability to give people and businesses more power and control over their finances. This is the driving force behind GSPT, i.e., providing a platform to the people where they can freely utilize their crypto assets in a fully secure, seamless, and affordable online environment and also providing them with opportunities in the form of discounts to earn lucrative earning in a seamless, risk-free environment. To execute our mission, we intend to solve some of the fundamental problems that a daily user has to face while executing a payment or doing an e-Commerce transaction using digital assets.

The Global Smart Pay platform (GSPT) is not just an app to make spending easier, it is an entire ecosystem driven by a global and versatile community. GSPT is a state of the art platform that unifies all major e-Commerce platforms, allowing consumers to enjoy online shopping seamlessly, securely, and cost-effectively is a state of the art platform that unifies all major e-Commerce platforms.

Apart from changing the face of the payments industry, **GLOBAL SMART PAY TOKEN** revolutionizes the way people look at and use all forms of money. Let's look at the life cycle of a currency unit to better understand how and what we expect of money. It serves as the bridge between the cryptocurrency world and the physical world to satisfy consumers who previously couldn't shop while using their digital assets. With the technology infrastructure offered by **GLOBAL SMART PAY TOKEN (GSPT)**, digital asset users (currently top 100 as per coin market cap.) would now be able to shop across their favorite major e-Commerce marketplaces and enjoy free shipping and up to 10% discounts, without even having to create individual accounts on the respective e-Commerce websites.

GLOBAL SMART PAY TOKEN (www.gspt.io) will not have a dedicated payment coin. The native Coin; **GSPT** will only be used as a utility Coin, use case currently granting discounts and other advantages. Payments will be accepted via other coins that would serve as multiple payment gateways, enabling efficient payment processing, remittance engine, social media tipping integration, smart contract-based escrow manager, and enabling the transfer of value through mobile app and the desktop wallet directly to the desired user. It will strive to fully harness the Blockchain technology to allow seamless buying and selling of products through various cryptocurrencies, without having the involvement of a third party. It will address the issue of conversion and liquidity by enabling consumers to spend their Coins directly through the platform.

AT THE POINT OF ISSUE

The Usual Fiat Currency Is Issued By The Central Bank And Is Also Backed By It. Its Value Is Not Derived But Dictated By The Government Forces And The Balance Of Trade Between Countries. Take The Case Of The Chinese Renminbi, Whose Actual Value Is Controlled By The Chinese Government By A Series Of Actions. The Chinese Government Buys Dollars In The Free Market And Keeps Them As Forex In Their Bank Vaults. This Increased Demand For The Us Dollars Is Fueled At The Cost Of Lowering The Cost Of The Chinese Renminbi. Since China Is A Global Exporter Of Goods, The Value Of The Chinese Renminbi Is Continuously Rising. Coupled With The Activities Of The Chinese Government, The Value Of The Chinese Renminbi Is Deliberately Kept Low. Such Activities Of Governments Keep The Value Of A Currency At The Will Of Those Running Governments And Steal It From The People.

AT THE MARKETPLACE

The Currency Unit Is A Store Of Value. It Denotes The Value That The Holder Had Provided To The Issuer. This Holder Can Transfer This Value To Any Other Person Of His/her Choice By Simply Transferring The Currency Units To The Desired Individual. The Place Where Multiple Such Exchanges Of Value Take Place Is Known As The Marketplace. It Is The Place For The Exchange Of Currency For Goods/Services. If The Government Does Not Interfere In The Functioning Of The Marketplaces, The Market Prices Assume A Fair Price But Run The Risk Of Cartelization And Monopolistic Activities Of Business Owners. That Is Capitalism. However, The Government Introduces Centrally Administered Prices For Certain Goods To Keep Cartelization At Bay, At Least For Essential Goods. This Is Socialism. Both Socialism And Capitalism Man Oeuvre The Market Forces And Rob Them Of Their Freedom.

IN THE HANDS OF THE CONSUMER

The Currency Unit, In The Hands Of The Consumer, Has Two Basic Functions:

1. Act As A Unit Of Exchange.
2. Increase In Value Over Time.

While The Governments In Many Parts Of The World Have Stabilized Enough To Enable A Single Currency Within Their Borders, The Case Of Cross-border Payments Is Still An Issue, With Payments Taking As Long As A Week To Travel From One Part Of The World To The Other, Despite The Advancement In Communication Technologies.

As Far As The Increase In Value Is Concerned, The Creeping Effects Of Inflation Eat Away Whatever Interest Is Gained By Putting That Currency In The Bank. In Fact, In Advanced Economies, The Interest Rates Are Already Near Zero Or Even Below Zero. Thus, The Hands Of The Consumers Are Being Weakened By The Use Of The Currency, Which Acts As The Store Of Value For The Rich And The Landed, While Acts As The Illusionary Carrot For The Rest Of Us.

WHO IS TO BLAME?

If You Were To Step Back And Look At The Bigger Picture, The **Current System Of Payments Is More Restrictive Than Enabling**. This Problem Arises From The Fact That Two Individuals Cannot Transact Business With Each Other Without The Presence Of A Trusted Intermediary Facilitating This Transaction. So, Alice Of America Wants To Send Money To Bob In Bangladesh, She Must Use A Bank's Service To Facilitate The Transaction. While The Technology Has Advanced To Such A Level That The Physical Presence Of Alice At The Bank Might Not Be Required, The Bank Still Must Be Present, Even If In A Depleted Form, To Act As An Intermediary Between Alice And Bob.

Similarly, Most Transactions Require An Intermediary To Act As An Organization That Both The Parties Can Trust To Act As Grievance Redressal, In The Event Of Any One Party Not Fulfilling Their End Of The Bargain.

The Overlapping And Conflicting Laws And Statutes Governing Different Countries Deem It Impossible For Multinational Companies To Maintain Uniformity Across Borders.

This Is The Reason Why There Exists An Amazon USA And Amazon UK. If This Is The Case With Advanced Countries, One Can Only Imagine How Hard It Must Be To Maintain Uniformity Across Countries That Sit On Diverse Economic Conditions And Philosophies. These Factors Make It Necessary For The Companies To Maintain Different Ledgers, And Hence, A **Gift Card Issued By A Company In One Country Is Invalid For The Same Company In Another Country.**

Now Take The Case Of Different Companies. It Is Even Harder For Them To Accept Gift Cards Issued By Other Companies.

THE INTRODUCTION OF CRYPTOCURRENCIES

When The Us Housing Market Crashed In 2008, Its Ripples Were Felt All Over The Globe. While The Banks Ultimately Came Out With A Mere Slap On The Wrist, The Consumers Were Left Penniless And Without A Roof Over Their Heads. It Was At This Time That Satoshi Nakamoto, A Pseudonym For A Yet-unidentified Entity, Wrote The Bit Token White Paper And Within A Year, Mined The First Bit Token Batch (Called The Genesis Block). What Bit Token Does Is That It Removes The Need For A Trusted Intermediary To Act As The Ledger Keeper. Instead, It Allows Any Individual, With Computing Power To Spare, To Act As A Member Of The Entire Bit Token Pool Which Acts As Miners On The Blockchain Ledger. Therefore, The Blockchain Is Decentralized And Public, As Opposed To The System Of Banks Which Is Centralized And Private.

With The Advent Of The Idea Of Bit Token, Various Other Cryptocurrencies Cropped Up To Fulfil Other Functions By Using The Decentralized Ecosystem Of The Blockchain. The Most Notable Among The Cryptocurrencies That Came After Bit Token Is Ethereum. It Builds Upon The Concept Of Bit Token As Digital Cash And Converts It Into Highly Programmable Smart Contracts To Automate The Transaction Processes Of Various Businesses. This Opened Up The Avenues For The Elimination Of The Wider Population Of Middlemen From The Transaction Cycles And Lower The Price Of Transactions By 70-90%. Ethereum Allows Any Idea To Use Its Blockchain To Create A New Token And Create Disruption In The Intended Market.

For Example, File Token Enabled A System Of Decentralized Storage And Incentivized It. You Will Be Paid To Allow The Use Of Your Hard-disk Drive For The Storage Needs Of Other People.

The **GLOBAL SMART PAY TOKEN** Is Slated To Be Launched In The Month Of March 2022 And Is Intended To Disrupt The Entire Payments Industry By Bringing Together The Regulatory Oversight, As Desired By Most Governments, While Also Leveraging The Power Of The Blockchain To Enable A Seamless Payments Ecosystem That Is Not Slowed/Encumbered By The Forces That Hamper The Existing System.

AN INTRODUCTION TO SMART CONTRACTS

An Innovation Of The Ethereum Blockchain, Smart Contract Is An Automated Series Of Steps That Were Once Performed By Humans. For Example, When You Buy Candy At A Store, The Shopkeeper Hands You Candy And You Hand Him Money. This Calls For Implied Trust Between The Shopkeeper And You. It Has No Remedies For The Shopkeeper If You Take The Candy And Run Away, Or If The Shopkeeper Takes Your Money And Refuses To Give You Candy.

On The Blockchain, Due To Its Anonymous Nature, The Chances For Refusal Are Higher. Moreover, The Entire Distributed Ledger Technologies (DLT) Framework Calls For Trust-less Transactions Where Both Parties Can Transact Business Without Exhibiting Or Expecting Any Form Of Trust. This Is Where The Smart Contract Enters The Picture. The Smart Contract Can Be Programmed To Ask You, The Buyer, To Put A Particular Currency In An Escrow Account. When The Shopkeeper Transfers The Candy To You And Both Of You Agree That The Candy Has Been Transferred, The Escrow Releases The Funds To The Shopkeeper.

MONEY LAUNDERING AND ANONYMOUS TRANSACTIONS

The First Cryptocurrencies, Notably Bit Token Was Created With Anonymity And Privacy As The Founding Blocks, Just As Decentralization. This Led To The Booming Use Of Cryptocurrencies For Conducting Nefarious Business Activities Such As Money Laundering For Terror Financing, Trading Illegal Items On The Internet, And Even Hiring Contract Killers, Just To Name A Few. This Led To A Lot Of Negative Publicity For The Fledgling Cryptocurrency Community And Led It To Be Labelled As The Currency Of Choice For Global Terrorists Such As Is And Others. The Lack Of Regulatory Oversight Was Frowned Upon By The Governmental Organizations, The Very Organizations That Played A Part In The 2008 Banking Crises And Dissuaded The General Public From Buying And Selling Cryptocurrencies.

THE GLOBAL SMART PAY TOKEN INNOVATION

The **GLOBAL SMART PAY TOKEN** Is A Utility Token That Exists On The Binance Blockchain And Resides In Your Digital (Bep20) Wallets. **It Exists Only Digitally And Has No Physical Form.** Thus, It Is Infinitely More Environmentally Friendly Than The Other Currencies Which Need To Be Printed/Minted/Reissued. This Also Means That You Cannot Lose Your **GLOBAL SMART PAY TOKEN (GSPT)** Or Misplace Them Like You Lose/Misplace Your Currency Units.

The Game-changing Feature Of The **GSPT**, That Is, **Cross-border Acceptability And Retailer-independent Redemption**, Makes Them Infinitely Superior To The Traditional Currency Units. As There Is Only One Ledger (Blockchain), And It Is Universally Trusted, The **GLOBAL SMART PAY TOKEN (GSPT) Become The Invaluable Connecting Link Between National Boundaries And Diverse Retailers.** All Transactions Get Verified On A Global Scale Before They Are Recorded On The Blockchain, Transparently And Immutably. Thus, Unlike Other Virtual Currencies, **GSPTs** Belong To No 'Walled Garden' And Can Be Used In Any Country, Redeemed At Any Partnering Retailer.

When You Buy **GLOBAL SMART PAY TOKEN (GSPT)**, You Can:

- Hold Them In Your Wallets For Providing **Future Gateway To The Forex Industry.**
- Use Them To **Buy Gift Cards** From Retailers You're Actually Going To Use, In The Denomination That You See Fit.
- **Send It** Directly To Your Friend's Wallet Across Countries And Continents. **GSPTs** Are The Utility Tokens That Enable **Last-mile Redemption** Of One Form Of Fiat/Cryptocurrency To The Other, In A Fast And Inexpensive Manner.
- Buy Other **Cryptocurrencies.**
- Do Your Bit To Save The Planet By **Lowering The Carbon Footprint.**

The Winning Shot Of The **GLOBAL SMART PAY TOKEN** Is The Strict Adherence To KYC/AML Norms Of The Jurisdictions Where The Trading Of Its **GLOBAL SMART PAY TOKEN** Is Allowed. All Participants Must Get Their KYC Documents Verified Before Being Issued **GSPT**, Or By Way Of Purchasing. This Will Allow Complete Concurrence With National And State Laws Of The Places Where The **GLOBAL SMART PAY TOKEN** Will Be Made Tradable. In Cases Of Unauthorized Access And Money Laundering, A Police Complaint Will Result In The Freezing Of The Recipient Wallet Address And That Of Transactions To And From That Wallet Address.

In Sum, While The Regular Currency Is Retailer-specific And Geographically Bound, **GLOBAL SMART PAY TOKEN** Has No Such Boundaries. **The Journey Of Traditional Money Is Too Simple And Too Linear** To Create Either The Customer's Satisfaction Or That Of The Retailer. Meanwhile, **GSPTs Utilize The Blockchain To Create A Win-win Situation For The Consumers And The Retailers**. The Finesse Reflects In The Circular Journey Of The **GSPT**, Which Makes For An Engaging Customer Experience While Connecting The Digital And The Physical Ecosystems, Seamlessly. **And Someone Said That The Twain Shall Never Meet.**

THE GLOBAL SMART PAY TOKEN PLATFORM

Now That We Understand That The Chief Ailments Of The Business Sector Are:

1. The Multiplicity Of 'Trust' Organizations.
2. The Absence Of A Universally Accepted Ledger.
3. The Rising Cost/Fees/Taxes Of Conducting The Business.
4. Overlapping And Counter-active Legislations Of Cross-border Jurisdictions.

And These Ailments Have Persisted Over The Ages, Even Compounded. These Ailments Can Also Be Attributed To The Effects Of A Fragmented Society Of People. Since The Interests Of The Chinese People Is Distinct From That Of The American People, The Fragmentation Of Goods, Services, And Logistics Is Bound To Occur.

The **GLOBAL SMART PAY TOKEN** Has Been Designed In Such A Way To Solve All Of These Problems By Taking The Security And Transparency Of The Blockchain And Marrying It To The Judicial Oversight That Was Missing In The Blockchain World Until Now. The **GLOBAL SMART PAY TOKEN** Is Designed As On Bep20 That Allows It To Be Stored On Any Binance - Compatible Wallet.

THE GLOBAL SMART PAY PLATFORM CONSISTS OF:

1. THE GLOBAL SMART PAY TOKEN FUTURE GATEWAY.
2. THE GLOBAL SMART PAY GAMING.
3. THE GLOBAL SMART PAY PARTNER AGENCIES/FIRMS/COMPANIES.
4. THE GLOBAL SMART PAY (OTT).

Each Facet Of The **GLOBAL SMART PAY** Platform Is An Integral Part Of The **GLOBAL SMART PAY** Ecosystem And Serves As The Fundamental Building Blocks Of The Platform. THESE BUILDING BLOCKS ARE CONNECTED INTRICATELY WITH EACH OTHER THROUGH APIS AND RUN A LAYER OF KYC/AML CHECKS ON TOP OF EACH LAYER INDIVIDUALLY AND IN COMBINATION. Every Stakeholder And Participant Of The **GLOBAL SMART PAY** Platform Must Compulsorily Submit Their KYC Documents To Their Respective Regional Authorities And Create An Id At The **GLOBAL SMART PAY** Platform Before Being Able To Buy/Sell Goods Or Services, Or Avail Any Of The Benefits Of The **GLOBAL SMART PAY** Platform.

THE GLOBAL SMART PAY TOKEN FUTURE GATEWAY.

The Connecting Link Between Forex Traders & Forex Industry On The **GLOBAL SMART PAY** Platform Is The **GLOBAL SMART PAY Token**. It Allows Retailers And Partner Agencies To Create A KYC/AML Verified Profile On The **GLOBAL SMART PAY Token** And List Their =Services Along With The Prices At Which They Are To Be Sold, On The **GLOBAL SMART PAY** Marketplace. All Transactions On The **GLOBAL SMART PAY** Marketplace Will Be Denominated In **GSPT**.

THE GLOBAL SMART PAY GAMING

GLOBAL SMART PAY Gaming Another Future Prospect Taught Us About Ott, Gaming Was A Different World. Today's **160 Billion Dollar** Industry Was Once Just A Bunch Of Friends Cramming Bulky TVS Into A Basement Every Friday Night For Some Halo Split-screen. Now, Watching Esports Is More Popular Than Watching 'Real' Sports. So, It's No Surprise That Starting Our Own Gaming Platform Can Feel A Little Bit Daunting.

THE GLOBAL SMART PAY PARTNER AGENCIES/FIRMS/COMPANIES

Any Registered Entity Of Legal Standing, Which Creates A Verified KYC/AML Compliant Profile On The **GLOBAL SMART PAY TOKEN(GSPT)** Token For Listing Its Goods And Services, Can Use The **GLOBAL SMART PAY TOKEN'S** Partner Logo To Market Its Wares.

THE GLOBAL SMART PAY TOKEN

The Only Medium Of Transaction For The Exchange Of Goods And Services On The **GLOBAL SMART PAY** Platform Is The **GSPT**. These **GLOBAL SMART PAY TOKEN** Can Be Bought By Any Interested Party, After A Successful KYC/AML Check.

WHY BLOCKCHAIN

The Simple Answer Is, To **Break The Shackles That Make Cross-border Retail/Remittance A Pain** And To Provide A Universal Currency To Make Shopping More Intuitive Than Ever Before.

For Those Of You Who Don't Know About The Blockchain (Others Can Skip To The Next Paragraph), It Is A Secure, Yet Still, A Completely Transparent Record Book (Ledger) That Allows Entries To Be Recorded On Itself After Verification, But Strictly Disallows Any Subsequent Modification Of That Entry. Thus, **All Records Entered On The Blockchain Are Irreversible And Hence, Are A Tamper-proof Ledger.**

With **GLOBAL SMART PAY TOKEN** On The Blockchain And The Introduction Of The **GLOBAL SMART PAY TOKEN**— The World's First And Only Regulated Universal Shopping Cryptocurrency, Gaming Or On Ott Every **GLOBAL SMART PAY TOKEN** User Is Equally Empowered To Send/Receive And Exchange Value Across Countries And Continents.

GLOBAL SMART PAY TOKEN Plugs The Seemingly Unsolvable Problem Of Cryptocurrencies As Well. **The GLOBAL SMART PAY TOKEN Will Be The Bridge Between The 'Digitally Aligned' Crypto community And The Fiat-driven Markets Of Goods And Services.** You Walk Into Walmart And See That They Still Don't Accept Your Cryptocurrency As A Mode Of Payment. Instead Of Yelling At Them To Keep Up With The Times, Just Sign In To Your **GLOBAL SMART PAY TOKEN** Wallet From Your Smartphone And Convert Your Cryptocurrency To A Walmart Gift Card. Voila! Problem Solved. 'If The Mountain Will Not Come To Muhammad, Then Muhammad Must Go To The Mountain'.

All This Becomes Possible Because, At The Backend, The Blockchain Is Tirelessly And Dutifully Recording All **GLOBAL SMART PAY TOKEN** Transactions As Lines Of Securely Encrypted Code. **Since The Numbers Always Add Up, And The Process Is Entirely Automated, The Belief In The System Is Unprecedented.** Therefore, When Sending A Gift/Remittance From Adelaide To Addis Ababa, You Need, Neither A Chain Of Intermediaries Nor The Name Of The Recipient. Imagine Its Possibilities In Helping Investigative Journalists In War-torn Countries Receive Their Payments In Cryptocurrencies, And Redeem It At The Last Mile, As Something Untraceable, Like A Gift Card.

TOKEN DESIGN

The **GLOBAL SMART PAY TOKEN** Is A Bep20 Token That Is Central To The **GLOBAL SMART PAY TOKEN** Ecosystem. **As A Unit Of Exchange** - Once You've Bought A **GSPT**, It Becomes Your Last Mile Redemption Token. What This Means Is That You Can Use Any Cryptocurrency That You Own To Buy **GLOBAL SMART PAY TOKEN** And Then Convert It Into **Cryptocurrencies/Fiat/ Goods/Services**. It Solves Your Problem Of Not Being Able To Find Retailers Who Accept Your Doge Token (Or Any Other Cryptocurrency) As Currency. Now You Can Just Convert Your Doge Token Into **GLOBAL SMART PAY TOKEN** At Any Exchange And Then Convert Them To **Cryptocurrencies/Fiat/Goods/Services**.

While The Earlier Method Of Going To Changelly/Shapeshift/Exchange To Convert Your Alt Tokens To Btc/Eth Etc. And Then Withdrawing To Your Bank Account Took **Five Steps And A Total Of 1- 3 Working Days**, With **GSPT**, It Is Just **Three Steps And A Total Within Few Minutes Max**. That Is A **Reduction Of Over 97% In Your Transaction Processing Time**.

GSPT – TOKENOMICS

**GSPT – GLOBAL
SMART PAY
TOKEN**

**NAME OF TOKEN:
GLOBAL SMART
PAY TOKEN**

**SHORT SYMBOL:
GSPT**

**TOTAL SUPPLY:
70,000,000 (70
MILLION)**

**TECHNOLOGY:
BEP-20**

GSPT – DISTRIBUTION

■ Project Dev. & Operations ■ Marketing Team ■ Developer Team ■ Board Of Advisor ■ Airdrop & Bounty Program
■ Exchange Listing ■ Bonus ■ Public Sales ■ Minting, Staking & Rewards

ALLOCATION & DISTRIBUTION WILL OCCUR IN MULTIPLE STAGES:

In The First Stage, 70 MILLION GSPT Tokens Will Be Released In BEP-20 Token Format On The Network.

10 Million Tokens To Circulated Into Supply At The Inception.

Rest 60 Million Tokens To Be Released Into Supply Every Quarter Within 3 Years To Help GSPT Community For Sustainable Growth.

DEVELOPMENT

The Main Part Of Our Budget Will Be Allocated To Development. Since Software Development Requires Mostly Labour Of Skilled Employees This Part Of Our Budget Will Be Used To Pay Our Software Developers And Analysts.

IT SECURITY

Since the platform will be used as an escrow service between funder and solver, security is of utmost importance. Every version will need to be checked on software vulnerabilities.

- Infrastructures
- When developing software, it is necessary to have servers available to run a development, test, acceptance and production environments.
- Contingency budget
- This budget is the Ecosphere 'reserve fund'. This will be used when new budget needs arise, or when one of the other budget lines was underestimated and runs out of funding.
- Future vision
- Our vision is an open-source platform for the community, that runs decentralized and which is developed, maintained and governed by the community. Its mission is to boost open-source development and reward contributors in a fair and transparent way.

LAUNCHING OF GSPT PROJECTS

GSPT is the technical vertical of GSPT Ecosystem dedicated to development & deployment of the projects.

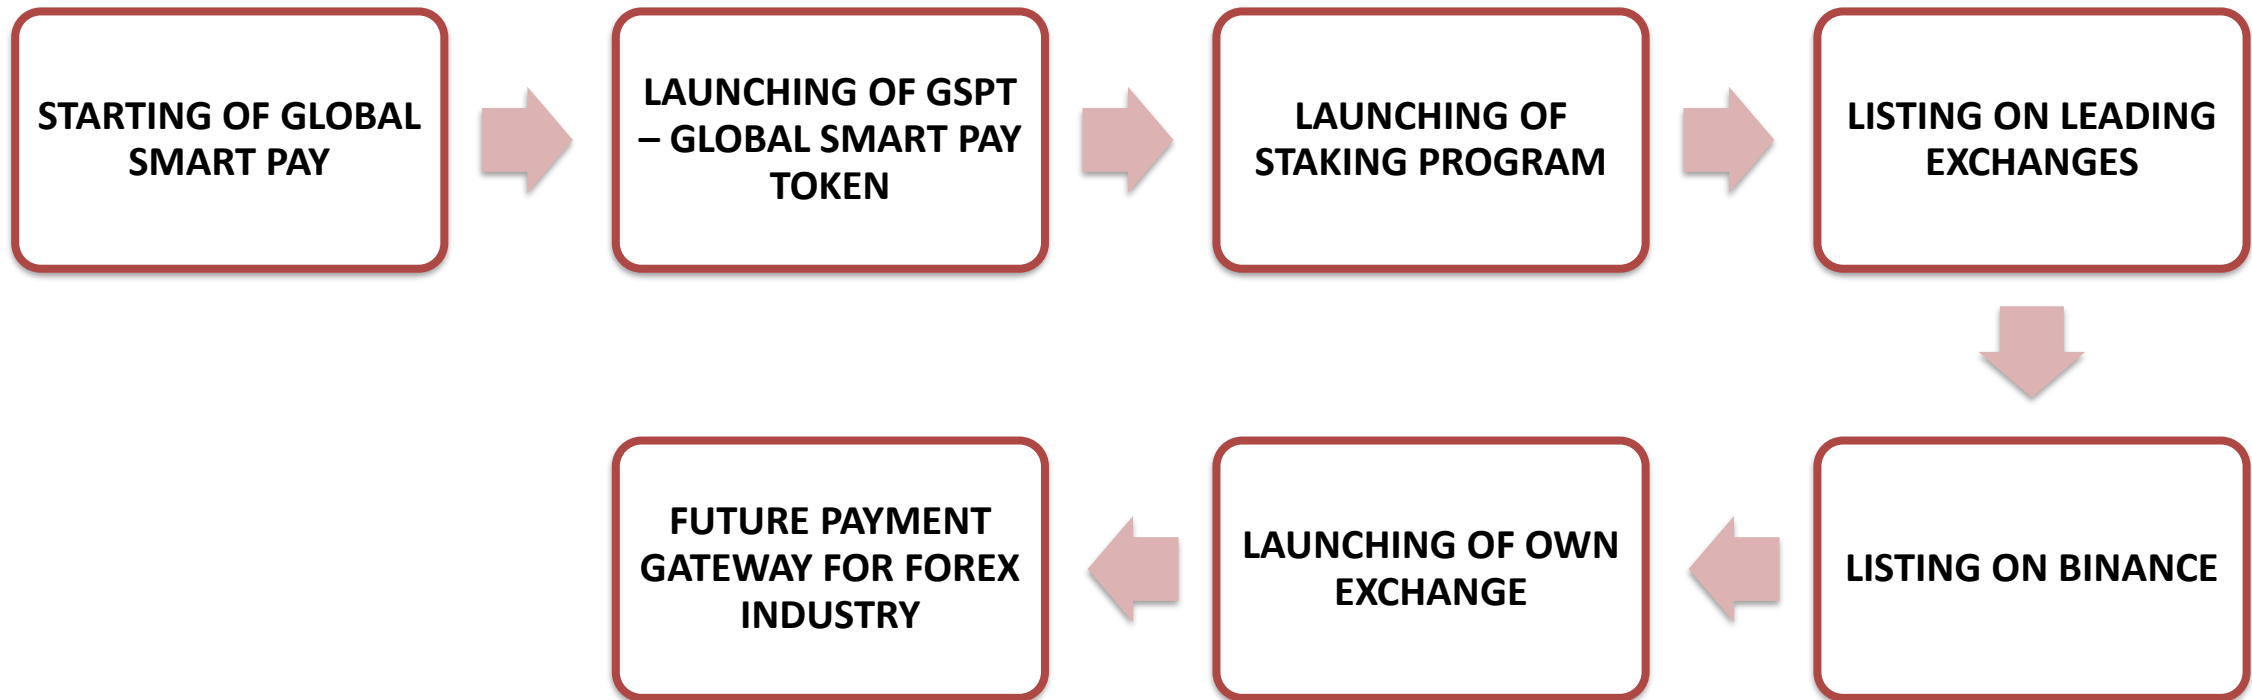

Following are projects on roadmap:

Payment Gateway for Forex Industry

Centralized Crypto Exchange

Hybrid Blockchain For Digital Gaming

GSPT – ROADMAP

KEY MOVING FORWARD

GSPT aims to create a universe for all the creators through the DEX, Hybrid Blockchain of Forex payment gateway Revolution in Blockchain Era, in a decentralized way. In the coming year, our team will develop an Future Gateway that will open doors for collaborations, exclusivity, and profits towards the community. Buy, Sell, Dream, Discover, and Explore the worlds like never before with us. Hybrid Blockchain will open the channels to bridge private blockchains & public blockchains with Governments or central establishments.

The platform in the future will add more advanced features to suit the advancements and growth. The use of future gateway by individuals and businesses all over the world is increasing at a rapid and exciting rate. Even as we live in a blockchain-enabled world, developing NFTs has arguably been complicated due to cost barriers, dysfunctional ecosystems, poor user experience, and resource constraints.

GSPT vision is to create a scalable system that will make creating, using, and trading far more accessible, cost-effective, and faster, thereby significantly increasing business and adoption. This would allow virtually any industry to use blockchain technology effectively accessing trillions of dollars in currently highly leveraged and unique real-world and digital assets.
